They provide groundwork in the basic management disciplines: accounting, marketing, business communication, finance, information management system, organizational behaviour and human resources, statistics, strategy, and supply chain management. The integrated foundation in these two modules is important for students because it not only allows them to build upon existing skills, but also to explore career options in a range of industries, and expand their understanding of various business fields. They help in laying a strong foundation to establish management knowledge and provide broad multi-disciplined knowledge that can be further studied in depth during the elective phase.
